(54) Title: COMPUTATION OF COMPRESSED VIDEO INFORMATION

(57) Abstract: During image compression alternative video compression technique are selected under control of an extent to which a computational resource is detected to be available for compression. A less or more resource intensive compression technique is used when more of the resource is available respectively. At least part of a frame from a sequence of frames from the video information is encoded alternatively using a first process by means of change information relative to a neighboring frame or using a second process independent from any neighboring frame in said sequence, dependent on the extent to which the resource is available it is selected to encode.

— with international search report

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 H04N7/50

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H04N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 5 508 743 A (IIZUKA YOSHIO) 16 April 1996 (1996-04-16) cited in the application column 1, line 12 -column 3, line 13 ---	1-6
A	US 6 275 614 B1 (SETHURAMAN SRIRAM ET AL) 14 August 2001 (2001-08-14) abstract column 1, line 32 -column 1, line 54 --- -/--	1-6

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

## \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- \*Z\* document member of the same patent family

Date of the actual completion of the international search

8 April 2003

Date of mailing of the international search report

14/04/2003
